

## 1BZDZ Series Disc Harrow

1BZDZ series of hydraulic double-wings on the weight of the rake unique single-beam design can be installed 32-66 disc rake tablets, divided into two raking discs before and after the gap, for wasteland, sticky soil, low wetlands, corn, corn Stubble, or stubble on a large area before the stubble tillage, plowing after deep plowing stubble, or no plowing surface to rake farming.

Working width from 250 cm to 700 cm, supporting power from 80 hp to 260 hp.

The rake front and rear rake piece dislocation design and both sides of the rake piece is X-shaped overall symmetrical design, the working angle can be adjusted, compact structure, easy adjustment, left and right balance, low center of gravity distribution is reasonable, work and driving stability, Easy to turn left and right, no leakage after work, surface formation, broken soil and stubble good, small radius of the head, high production efficiency.

1BZDZ series of hydraulic wings on the set weight rake equipped with large rubber tires, hydraulic system so that both sides of the rake group can be quickly and easily folded up and locked, so that the transport width of less than 2.5 meters and safe, in line with road traffic regulations in order to achieve A wide range of efficient operation, the characteristics of a narrow range of transport.

Model	Unit	1BZDZ-4.4	1BZDZ-4.8	1BZDZ-5.3
Overall dimension	cm	580x450x150	580x495x150	580x540x150
Weight	kg	3100-3150	3250-3300	3400-3450
Working width	m	4.4	4.8	5.3
Working depth	cm	20		
Blade spacing	mm	230		
No of disc	pc	40	44	48
Dia.of disc	mm	660		
Transport clearance	mm	>260		
Productivity	ha/h	4.4	4.8	5.3
Matched power	kw	105-110	115-120	125-130
Linkage		Trailed
